OBJECTIVE

Motivated Mechanical Engineering student with experience in multidisciplinary design projects and system-based problem solving. Skilled in analytical thinking, technical reasoning, and adapting quickly to new engineering concepts. Seeking an internship or volunteer opportunity to contribute to engineering analysis, design development, and collaborative projects within aerospace or mechanical engineering environments.

EDUCATION

York University

Toronto, ON

Honours Bachelor of Mechanical Engineering (BEng)

Sep. 2024 – Present

- GPA: 7.7 / 9.0 (as of Fall 2025)
- Expected Graduation: Jan. 2029
- Transferred 21 credits from Computer Science program; expected to complete 57 credits by 2026 academic year
- Selected EECS Courses: Introduction to Computing(A), Computational Thinking through Mechatronics (A+), Object Oriented Programming from Sensors to Actuators (A+)
- Selected Math/Physics Courses: Applied Calculus I (A), Applied Linear Algebra (A+), Applied Multivariate and Vector Calculus (A+), Differential Equations for Scientists and Engineers (in progress), Engineering Mechanics (A+)

PROJECT EXPERIENCE

Home Alarm System - Java Project - Grade: A+

Dec. 2025

- Built home security simulation using object-oriented programming with multiple system states and event-driven logic

Smart Water Plant Monitoring System - Java Project - Grade: A+

Feb. 2026

- Developed a Java-based simulation model of an automated plant monitoring system using conditional logic and threshold-based responses

Adaptive Desk Lamp - Engineering Design Project - Grade: A

Apr. 2026

- Designed and evaluated an adaptive lighting system using a light sensor and decision matrix to optimize performance and usability

WORK EXPERIENCE

Student Production Assistant

Toronto, ON

Hi-Tech EDM Ins.

- Coordinated production scheduling to ensure timely fulfillment of customer delivery deadlines.
- Verified technical documentation and materials to confirm project readiness and completion.
- Configured machine fixtures and loaded programs to facilitate efficient production runs.
- Inspected finished parts against engineering prints to ensure strict specification compliance.

Mathematics Tutor

Jan. 2026 – Present

Darsoon Institute

- Develop problem-solving strategies to improve student understanding and performance
- Teach mathematical concepts to students with varying levels of understanding using clear and structured explanations

Event Coordinator

Sep. 2025 – Dec. 2025

Iranian Student Association, York University

Toronto, ON

- Organized and executed student events, improving engagement within the university community

TECHNICAL SKILLS

Software & Tools: Java, JavaScript, MATLAB, HTML, CSS, MS Office (Excel, Word, PowerPoint, Outlook)

Engineering Concepts: Algorithmic Problem Solving, Sensor-Based Design, Data Analysis, Logical Control

General: Analytical Thinking, Rapid Learning, Attention to Detail, Problem Solving, Teamwork

AWARDS & ACHIEVEMENTS

Lassonde Continuing Student Scholarship *Awarded for maintaining an A-level GPA*

Aug. 2025

Lassonde Entrance Scholarship

Sep. 2024

Canadian Senior Mathematics Contest (CSMC) – Participant

2023
